Strategic–Product-Placement-Analysis-Unveiling Sales-Impact with Tableau Visualization

Functional Requirements

Following are the functional requirements of the proposed solution for **Strategic-Product-Placement Analysis.**

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Login / Registration	Login through Email ID
		Secure password authentication
		User profile management
FR-2	Data Integration	Import sales data from CSV/Excel
		Connect database to Tableau
		Data cleaning and transformation
FR-3	Product Placement Analysis	Identify product placement categories
		Analyze shelf position impact on sales
		Compare product visibility and sales performanne
FR-4	Tableau Dashboard Visualization	Interactive sales dashboards
		Product placement heatmaps
		Category-wise and location-wise sales visualization
FR-5	Sales Impact Analysis	Identify high performing placements
		Compare before and after placement strategy
		Generate insights and reports

Non-Functional Requirements

Following are the non-functional requirements of the proposed solution (**Strategic-Product** Placement Analysis with Tableau Visualization).

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	Easy-to-use dashboard interface with clear visualization and navigation
NFR-2	Security	Secure login, protected sales data, and controlled user access
NFR-3	Reliability	Accurate data processing and visualization with minimal errors
NFR-4	Performance	Fast dashboard loading and quick response while filtering data
NFR-5	Availability	24/7 access to dashboards and sales reports
NFR-6	Scalability	Ability to handle large sales datasets and multiple product categories
